

INTERCEPTOR FIRE

The Fire Interceptor protects your personnel, project and premises from the threat and risk of fire. If there's an emergency, you can use the manual call point to trigger an evacuation alarm, and fire extinguishers are on hand as the first line of defence. For 24/7 protection, you can add wireless heat and smoke detectors. When activated, they provide visual confirmation and automatically alert our alarm receiving centre.

Monitored response

In the event of a activation, visual verification will confirm if there is a breakout of a fire. Should this be the case, client-agreed protocol will be followed and the emergency services can be contacted to attend.

Complete protection

Using the Fire Interceptor for safety and protection gives your site a complete fire prevention package to meet requirements, eliminate delays and ensure all deadlines are met.

sitewatchgroup.co.uk

Interceptor Fire features

Fire extinguishers & Fire blanket
There are two extinguishers capable of combating all classifications of fires. Smaller fires can be controlled using the equipped fire blanket

Solar panel
There are two solar panels which provide sunlight power to the battery and keep the unit charged

100ah AGM batteries
Heavy duty, long life and reliable batteries provide up to 6 months between charges

Warning lights
Red strobing lights activate when alarm is triggered to alert personnel in the vicinity

Manual call point
If an emergency is identified by personnel in site the alarm can be raised by activating the manual call point

Fire graded sounder
Fire tone high-level warning can inform staff of an evacuation

Extendable legs
The extendable legs and feet on the unit can improve the stability upon deployment on all surfaces

Interceptor benefits

- Suitable for Internal or external placement at construction sites, vacant properties and more
- No mains power required
- Solar panel with battery backup provides up to 6 months charge
- Rapid Deployment to site - set-up within 30 minutes
- If suspicious activity or fire is viewed, the emergency services will be notified
- Built in tilt alarm
- Monitoring for faults and battery low
- Scheduled Arm/Disarm
