

SITWATCH
SECURITY

INTERCEPTOR PRO

The Interceptor Pro is a product focused on eliminating intruders. Equipped with four motion cameras and a 30m detection radius, we can easily identify if your site has been compromised. First defence features like the live voice alarm and strobing lights will deter unauthorised activities on site.

Monitored response

The four motion cameras integrated on the Interceptor Pro allow our monitoring centre to visually verify any intrusion. If required, either a private response or emergency services will be dispatched to the incident.

Mobile protection

Bring your security anywhere, with authorisation from our monitoring team we can change the location of each tower to protect valuables in a changing environment.

Interceptor Pro features

Modular panels
Four swappable panels ensure no downtime from your security. Any major faults will be repaired within 4 hours. An established site may also receive component upgrades throughout

Solar panel
There are two solar panels which provide sunlight power to the battery and keep the unit charged

100ah AGM batteries
Heavy duty, long life and reliable batteries provide up to 6 months between charges

Warning lights
This is a light that activates when movement is detected, this is to deter thieves and animals, it also gives us clear identification of people when images are sent through

MotionCam
This contains a dual motion sensor to detect motion and reduce false alarms. It has a built in camera and delivers images to our monitoring centre in event of an activation

Voice audio sounder
When activity is detected a live audio challenge warns intruders

Extendable legs
The extendable legs and feet on the unit can improve the stability upon deployment on all surfaces

Interceptor benefits
