

SITEWATCH
SECURITY

INTERCEPTOR VISION

Using the foundations of the Interceptor Pro, the Vision gives you more allowing you to experience 24 hour security on any site. Provide evidence of material thefts, workers safety and project progress throughout the day and let our monitoring centre view during the night, the Interceptor Vision is more than just security, its peace of mind for project management.

Monitored response

With every activation from your site, the monitoring team will be able identify the threat level using the live camera view. If required both the police and a rapid mobile patrol unit will be dispatched.

24 Hour Protection

Enhancing your security and improving health and safety standards, our 24-hour video feed allows you to review any incidents during working hours and see exactly what happened.

Interceptor Vision features

Extendable mast
3.6 Meters ensures full camera coverage across any project

Warning flood lights
LED flood lights activate when movement is detected improving picture quality for verification as well as alerting intruders that they have been caught

Modular panels
Four swappable panels ensure no downtime from your security, with any major faults will be repaired within 4 hours. An established site may also receive component upgrades throughout

Voice audio sounder
When activity is detected a live audio challenge warns intruders

150ah AGM batteries
Heavy duty, long life and reliable batteries provide up to 6 months between charges

Extendable legs
The extendable legs and feet on the unit can improve the stability upon deployment on all surfaces

4K Cameras
The upright mast houses three cameras which record 24 hours a day in 4K definition, all linked to the client app. All cameras are AI enabled to deter false alarms, they can detect animals, cars and humans apart

Security benefits: The live camera feed from the Vision allows real time monitoring and protection to a larger area of your site

Health and Safety: Recording during the day and live view allows managers to playback through footage and ensure accidents are well logged

Workplace theft: With workplace theft of materials increasing, recorded footage from the Vision can be downloaded to identify the culprit and avoid future incidents

MotionCam
This contains a dual motion sensor to detect motion and reduce false alarms. It has a built in camera and delivers images to our monitoring centre in event of an activation

Solar panels
The larger solar panels on the Vision give 340w of total solar charge which helps meet supply chain emission standards

Interceptor benefits

Suitable for Internal or external placement at construction sites, vacant properties and more

No mains power required

Solar panel with battery backup provides up to 6 months charge

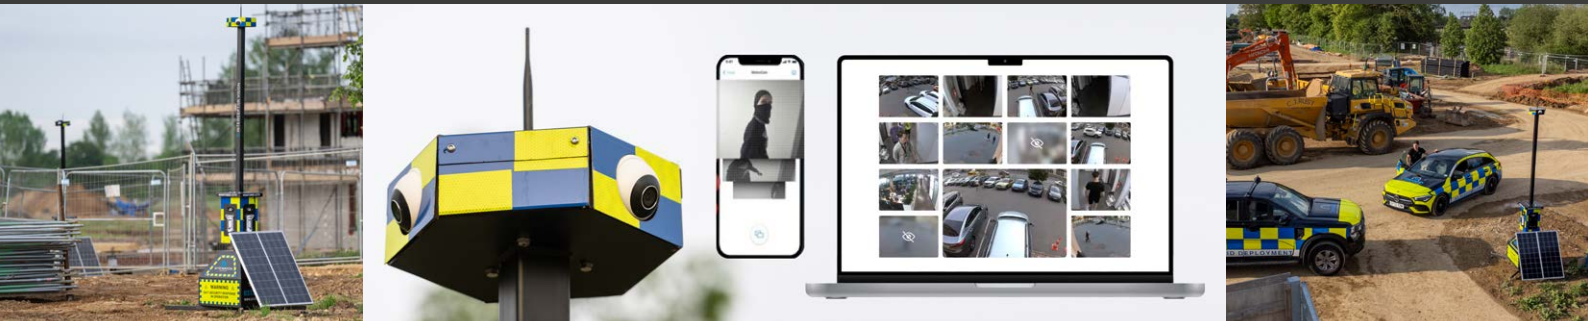

Rapid Deployment to site - set-up within 30 minutes

If suspicious activity is viewed, the emergency services will be notified

Built in tilt alarm

Monitoring for faults and battery low

Scheduled Arm/Disarm
